

The Exchange/ORS Clean Green Program

Thanks for your interest in participating in The Exchange/ORS Clean Green Pilot Program! We are sure that you, like us, find it ridiculous to ship potential soil off of an island...

On our way to a larger composting program, we are starting small:

We will accept any amount of clean, green material as long as it is 100% free of any non-organic material, and 100% free of noxious weeds.

We will accept these materials for a **\$100/ton** or 66% discount off our regular scale weight price of \$300/ton.

To make this work, we must have clean material. You will be asked to unload your materials in an un-supervised location. Therefore we are asking that you read this form carefully and sign it.

Please be advised that we will randomly inspect your green loads!

I, _____,
(print name)

Understand that I can only bring 100% organic, weed-free, green material to The Exchange/ORS for composting. If my load is found to be non-conforming I will come back and pick it up and move it to the tipping floor, and pay the full garbage rate for the material.

I also know how and where to unload these materials and I agree to do so safely and at my own risk. If I need help I will ask an Exchange/ORS employee for assistance.
